Professional Summary

Cleared federal consultant delivering secure, healthcare IT solutions for government clients. Currently guiding Cerner Patient Accounting revenue cycle implementation for a large federal healthcare client at Oracle Health, overseeing billing, charge capture, and claims/accounts receivable workflows alongside embedded Contract Management functionality. Previously led client communications independently across multiple Transaction Services engagements. Skilled at translating complex clinical and financial systems into actionable recommendations for stakeholders in regulated, ambiguous environments.

Professional Experience

Oracle Health Consultant

Remote

Oct. 2022 - Present

- Advise federal healthcare clients on Cerner Millennium revenue cycle systems under active federal security clearance, guiding integration, validation, and compliance across implementation phases
- Serve as primary client-facing point of contact across multiple engagements, managing stakeholder communications and driving delivery alignment
- Present Cerner Patient Accounting, Contract Management, and Transaction Services solutions to government stakeholders, translating technical capabilities into actionable recommendations and driving client alignment through delivery

Projects

Federal Healthcare Client Revenue Cycle Implementation

CPA / CCM
Current

- Guide integration and validation of Cerner Patient Accounting billing, charge capture, and claims/accounts receivable management workflows
- Support Cerner Contract Management functionality for the same client, helping identify accurate reimbursement calculations and potential revenue recovery opportunities

Transaction Services Engagements EDI Implementation

Transaction Services
2022 - 2025

- Independently led client communications and stakeholder management across multiple Transaction Services engagements, serving as primary point of contact for implementations spanning EDI, claims editing, eligibility verification, Automated Messaging, and Payment Terminals/POS systems
- Guided clients through electronic eligibility verification and claims processing configuration, ensuring accurate payer-facing transaction service setup
